Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 3, 2005 has been entered.

Response to Amendment and Arguments

2. Applicant's amendment filed on November 3, 2005 has been entered and made of record.
3. Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the 112 first paragraph rejections below.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant

art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Referring to claim 1, the phrase “reviewing each candidate string to determine if all candidate characters of a candidate string conform to the same character type; removing from further consideration any candidate string that includes candidate characters conforming to different character types” in lines 13-16 is not supported by the applicant’s original specification. More specifically, the Examiner was unable to find an instance in the applicant’s specification that discloses the step of reviewing each candidate string to determine if all the candidate characters of a candidate string conform to the same character type.

Furthermore, the Examiner was unable to find support for the step of “removing from further consideration any candidate string that includes candidate characters conforming to different character types.” Instead, the applicant’s specification appears to indicate that all candidate strings, including those that contain candidate characters conforming to different character types, are considered during the selection process. For example, in paragraph 25 on page 8, it states, “Once the candidate strings 310 and 314 have been concatenated, a combined confidence indication 312 and 316 is calculated for each candidate string 310 and 314...Once the combined confidence indications 312 and 316 have been calculated, a result string can be selected as the candidate string 310 and 314 with the highest combined confidence indication 312 and 316.” Note that candidate string 314 includes candidate characters conforming to different character types (figure 3). However, the candidate string is still considered during the selection process and not removed from further consideration, as recited in claim 1.

A similar rejection is applicable to claims 7 and 13.

Claims not mentioned specifically are dependent from non-supported antecedent claims.
